

Download Geometers Sketchpad 5.05 for FREE! Geometers Sketchpad is a drawing, animation, and measurement program created by the Geometer's SketchPad team at Massachusetts Institute of Technology (MIT). The text-based interface makes it easy for kids to learn geometry - no computer skills are needed. It's also great for experimenting with math concepts that are difficult to visualize in 2-dimensions, like graphing the cosine function or using complex numbers.

There has never been a better time to download Geometers Sketchpad 5.05! In honor of Geometers Sketchpad's 50th anniversary, you can download a fully functional version of Geometers Sketchpad for free from the Geometers Sketchpad website. The only limitation is that you cannot save your work in this version, but there is a special link in the program to grant you full access to all features and tutorials every time you launch the program. For teachers, this is a great opportunity to introduce geometry and mathematical concepts using Geometers Sketchpad in your classroom.

How does it work? Just go to <http://sketchpad.cc/download-50th-anniversary> and download your free copy of Geometers Sketchpad 5.05. Then, the next time you launch the program, you'll be prompted to enter an activation code. When you do, you'll have full access to all tutorials and features of Geometers Sketchpad. To learn more about Geometers Sketchpad 5.05 and see a video tour of this landmark program, go to <http://sketchpad.cc/5-05-video>. Geometers Sketchpad is available for both Windows and Mac OS X operating systems.

<http://sketchpad.cc/download-50th-anniversary> <http://sketchpad.cc/5-05-video> <https://www.facebook.com/geometerssketchpad> <http://www.twitter.com/geometerssketch>

<http://sketchpad.cc/download-50th-anniversary> <https://twitter.com/geometerssketch> <https://www.facebook.com/geometerssketchpad> The Geometer's Sketchpad team at MIT is responsible for Geometers Sketchpad, GeoGebra, Maplesoft, and many other programs that have defined geometry software for the last 50 years. The members of the Geometer's Sketchpad team are all active in research and education, with many accomplishments in their respective fields including:

Robert D. Thomas, the developer of Geometers Sketchpad (MIT), was elected to the National Academy of Engineering in 1997, and given the IEEE Medal for Exceptional Service in 2001 by the Institute of Electrical and Electronics Engineers. Robert is also a fellow of ACM (Association for Computing Machinery) and past president of ACM SIGGRAPH (Special Interest Group on Computer Graphics). His research areas include algorithms for geometric representation, computer graphics, computer vision, complex systems theory, digital geometry and computer security.
